

HELPFUL HINTS FOR MEASURING

When using side wall mount, overlap the opening at least 3 inches on each side and 1 foot above the door opening for a better seal. Therefore, order your door 1 foot taller and 6 inches wider than actual door opening.

When using under lintel mount, order the same size door kit as your clear opening.

- For taller doors, the strips should be heavier and wider.
- Narrow strips are easier to pass through than the wider strips.
- When air movement is a problem, choose the wider strip.
- Fasteners for mounting hardware to the existing building materials are **not** included.

Products Available from Centaur® HTP®

RAIL FENCING

CenFlex® 5" Flexible Rail

COATED SINGLE WIRE FENCING

- White Lightning® Coated Electric Wire
- PolyPlus HTP® Coated High Tensile Wire

- Lets fresh air in but keeps birds and insects out
- Indoor/outdoor use
- Door kits available

- Keeps flies out! Insects perceive the amber color as black and will not try to enter.

KleerFlex Strips

- Superior clarity
- Keeps birds, insects and dust out
- Rounded edges help prevent cutting
- Concave to promote a tighter seal
- Non-stick additive to prevent clinging
- Formulated for indoor/outdoor applications, withstanding temperatures from -10°F to 150°F
- Will not discolor in sunlight

MaxBullet® Hardware

The MaxBullet® Hardware features a unique bullet-shaped locking feature for easy snap-on/snap-off strip replacement. Once the hardware is attached to a door frame, no tools are required to attach strips. Initial hardware installation is 75% faster! Strip replacement is 90% faster! Made from 6061 alloy aluminum (aka - aircraft aluminum).

MaxBullet® hardware comes with a **LIFETIME GUARANTEE.**
