

- **3x Stronger than Tape**
- **Highly Visible for Safety**
- **Will Not Fade, Crack or Peel**

**Hot-Site® Electric HTP® 1" Rail** is a permanent fence that combines the patented Centaur® HTP® technology with electric eliminating the need for a dangerous separate hot wire.

**Hot-Site® is the safest electric fence available!** By combining electric properties within the rail, Hot-Site® protects your horse without the need for a separate hot wire that will slice a horse like a knife.

**Hot-Site® Electric HTP® 1" rail withstands impact without risking injury to your horse.** Our flexible design means no caught legs or entanglement injuries.

- No Splinters • No Painting**
- No Rust • No Peeling**
- No Cribbing • No Problem**

**SPECIFICATIONS** **ELECTRIC**

Total Rail Width	1"
Roll Length	500'
Steel Wire	15-Gauge
Min. Break Strength	2,000 lbs
Weight Per Roll	33 lbs
Colors	White <input type="radio"/> Black <input type="radio"/> Brown <input type="radio"/>

**Sure-Fit®  
 Safety  
 Sleeve**

**Unique T-sleeves convert a metal T-post into an HTP® post that is much safer and more attractive.**  
 Durable and impact resistant.  
 Available in white or black.

**Exclusive Sure-Fit® Safety Sleeves** fit securely over standard metal t-posts

Hot-Site® Electric HTP® 1" Rail is manufactured in Muscle Shoals, Alabama  
 Patent # 6,834,846

# Hot-Site® Electric HTP® 1" Rail

**Centaur® is the inventor of High Tensile Polymer (HTP),** a material that is a blend of impact modifiers, UV stabilizers, and anti-fungicides. Formulated for strength, durability and appearance, HTP® fencing material is color fast, stain-resistant and mildew resistant.

**Used as a bottom rail, Hot-Site can help keep out predators.** The electric shock acts as a buffer to your animals helping protect them from predators and wild animals.

**Insulated Fencer's Lasso**  
The Insulated Fencer's Lasso is the easiest and fastest way to terminate, insulate and tension electrified single strand products! Combination of a heavy-duty end strain insulator and tensioner with a pre-fastened looped cable.

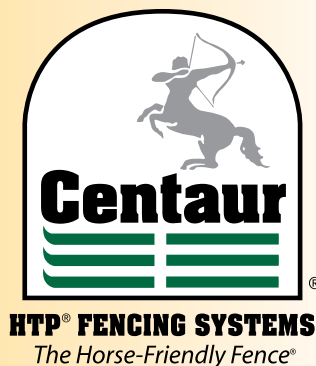

## Hot-Site® Electric HTP®

- 1" wide rail configuration combining non-conductive polymer with electric
- Each rail is installed in a continuous length allowing impact to be absorbed by the entire length of the fence
- Made in the USA
- Fence life is 20+ years with a 20-year limited warranty
- Hot-Site® Electric HTP® 1" rail is easily combined with other Centaur fencing to fit your budget or design needs
