

## Lucy Loomis

Lucy Loomis knew she had made the correct decision when she installed Centaur® HTP® and Spur HTP® fencing on her 8-acre farm at the Sarasota Polo Club in 1994. A dozen years later she moved to Aiken, South Carolina, and changed the color of the rails but not the brand. Lucy had read the literature on Centaur's safety advantages but didn't realize she would witness incidents when horses created situations that might have been fatal with a different fencing material.

"My friend's mare had been turned out with her blanket on and she just went crazy. She ran around a bit and then jumped the fence into the next paddock. By this point the blanket was hanging down but she was thinking about jumping back. At the last minute she changed her mind and skidded into the fence. All four legs went under the rail but the only injury came when her head hit the post. This mare is still playing polo today." Lucy also remembers that this frantic pony was trapped under the fence. "She thrashed around until she got herself out but didn't have any cuts on her legs!"

After relocating to Aiken, South Carolina, Lucy knew that Centaur was the only fence for her new property. Centaur HTP® 5" rail is keeping her horses safe and happy at their new home.

**C**

**End Strain Insulator**  
Centaur's end-strain insulator is specially designed to deliver maximum insulation under extreme pressure from high-tensile wire and end terminations. Available in white only.

**F**

**T-Post Insulator**  
Sure-Fit® T-Post insulators fasten securely to T-Posts with a wrap-around application. The insulator can be removed and re-attached and is designed with a large opening to work with any polymer coated wire. Available in white or black.

**O**

**Wood Post Insulator**  
Sure-Fit® wood post insulators are specially designed with a large opening to work with any polymer coated wire. Available in white or black.

**M**

**Bracket Insulator**  
A unique bracket type insulator designed to be used on pipe or woodpost. For use with Hot-Site® or any tapes up to 1-1/2" wide. Available in white or black.

**Q**

**Undergate Cable**  
Use to carry power from the energizer to fence or bury under gates. Specially designed polymer coating protects against voltage leakage in extreme conditions. Available in black only.

**L**

**Line-Tap Connector**  
Slotted bolt type connector used to make electrical connections. Eliminates power losses from poor connections. One tap can be used to make multiple wire connections.

**G**

**Insultube**  
Use for the alternative types of insulation on White Lightning® and wire. Available in white or black 100' rolls.

**E**

**Endsulator™ Hook**  
Used to attach an in-line tensioner to any bullnose insulator. No tools needed.

**A**

**Insulated Fencer's Lasso**  
The Insulated Fencer's Lasso is the easiest and fastest way to terminate, insulate and tension electrified single strand products! Combination of a heavy-duty end strain insulator & tensioner with a pre-fastened looped cable. Fits up to 8" diameter post.

**B**

**Fencer's Lasso**  
The Fencer's Lasso is an end strain insulator with pre-attached cable and preformed loop which allows for the fast attachment of an end post in just seconds without any tools. Will fit up to 8" diameter post.

**D**

**In-Line Tensioner**  
Ratchet type strainers designed to take high tension of Centaur products. Used to tighten Spur®, PolyPlus®, PolyStrand®, White Lightning® and Hot-Site®. Tightening handle sold separately.

**H I**

**Wire Links**  
Securely splices wire together with a smooth safe splice. No special tools needed. Strip approximately 1" of polymer coating and insert bare wire into wire link. 12.5 gauge link and 15 gauge link available. 15 gauge for Hot-Site® only.

**R**

**Diagonal Brace Plate**  
The Endsulator™ Kit is an end strain insulator with pre-attached cable and preformed loop which allows for the fast attachment of an end post in just seconds without any tools. Will fit up to 8" diameter post. Kit includes the Endsulator™ Hook

**Z**

**Lag Corner Insulator**  
The Lag Corner Insulator screws directly into wooden corner posts while holding the high-tension wire away from the post to prevent grounding of the electric current.

**N**

**Barbed Staples**  
Galvanized barbed staples eliminates rust staining. Available in 1-3/4" to be used with PolyPlus®.

**T U**

**Barrel Tensioner**  
Centaur's barrel tensioners constructed of heavy-duty steel make installation faster and easier. Available in one-way for short runs and two-way for long runs. Available in white, black or brown.

**S**

**Insulator Pad**  
Used to insulate the barrel tensioners when used with Hot-Rail®. Each 6" x 4" pad can be cut to size during installation. Available in black.

**K**

**Sure-Fit® Safety Sleeve**  
Eliminates the need for insulators by covering the post with pre-cut notches for wire and slots for Hot-Site® and tape. Made out of high density poly-ethylene, it's durable and impact resistant providing years of maintenance-free service.

# Sure-Fit® Accessories

Safer, Stronger, and Lasts Longer

DD

### Spur® Cover

Covers in-line tensioners for installations of Spur® HTP® 4" rail. Available in white, black or brown.

BB CC

### Nails

Galvanized barbed nails eliminate rust staining. Available in 3.5" to be used to install brackets and 5" to be used with in-line tensioners.

Y

### Spur® Bracket

Special galvanized steel bracketing system works like "belt loops" allowing rails to remain taut and flexes to disperse impact. Available in white, black or brown.

FF

### Crimper Tool

Heavy duty crimping tool. Can be used for crimping both 12.5 gauge and 15 gauge wires.

EE

### Crimp Fitting

For fast and easy splicing of 12.5 gauge wire.

AA

### Centaur Cyclone Spinning Jenny

Heavy duty construction fits all Centaur fence products or high tensile wire.

V

### Centaur/Hot-Rail® Bracket

The patented two-piece "belt-loop" bracketing system allows the rail to slip through, dispersing impact. Special brackets have a steel core for added strength and durability. The polymer coating acts as an insulator for Hot-Rail®. Available in white, black or brown.

II

### Splice Cover

Attractively conceals rail splices for a clean, professional appearance. These easy-to-install covers protect rail splices from the elements and curious horses.

W

### CenFlex™ Bracket

The patented one-piece "belt-loop" bracketing system allows the rail to slip through, dispersing impact. Bracket has a steel core for added strength and durability. Available in white, black or brown.

HH JJ KK

### Energizer

Operates on a standard 110 volt plug, 12 volt battery, or as part of a solar system.

## SURE-FIT ACCESSORIES

Centaur's Sure-Fit® accessories are designed to give you the maximum range of options when it comes to designing and installing your Centaur® HTP® fencing system. All components are produced to the highest quality standards, assuring you a fence installation that will stand the test of time.
